

Science from the Next Generation Imaging and Spectroscopic Surveys

ESO-Garching, 15-18 October 2012

Poster presentation on Tuesday, 16 October 2012, 15:20 – 15:40

Bragaglia Angela	The open clusters in the Gaia-ESO Survey
Bramich Daniel	Systematic trends in SDSS photometric data
Girardi Leo	APOGEE at a Glance
Huckvale Leo	Initial results from the VVV difference imaging analysis pipeline
Saito Roberto	A first glimpse on novae studies with the VVV Survey

Poster presentation on Wednesday, 17 October 2012, 15:50 – 16:10

Andernach Heinz	Finding Giant Radio Galaxies (GRGs) in Imaging Radio Surveys
Bout Jeffrey	Hunting galaxy transitions in the Hercules Supercluster
Mieske Steffen	Science operations of OmegaCAM
Retzlaff Joerg	Releasing ESO Public Survey Data through the Phase 3 catalogue facility
Zabl Johannes	XSHOOTER follow-up spectroscopy for VISTA NB118 selected [OII] emitters at $z=2.2$ – A pilot study
Côté Patrick	CASTOR - The Cosmological Advanced Survey Telescope for Optical and uv Research
Daniel Matthews	Reconstructing Redshift Distributions Using Cross-correlations of Spectroscopic and Photometric Surveys
