

ESO, the European Southern Observatory, was created in 1962 to ... establish and operate an astronomical observatory in the southern hemisphere, equipped with powerful instruments, with the aim of furthering and organising collaboration in astronomy ... It is supported by eight countries: Belgium, Denmark, France, Germany, Italy, the Netherlands, Sweden and Switzerland. It operates the La Silla observatory in the Atacama desert, 600 km north of Santiago de Chile, at 2,400 m altitude, where fourteen optical telescopes with diameters up to 3.6 m and a 15-m submillimetre radio telescope (SEST) are now in operation. The 3.5-m New Technology Telescope (NTT) became operational in 1990, and a giant telescope (VLT = Very Large Telescope), consisting of four 8-m telescopes (equivalent aperture = 16 m) is under construction. It is being erected on Paranal, a 2,600 m high mountain in northern Chile, approximately 130 km south of Antofagasta. Eight hundred scientists make proposals each year for the use of the telescopes at La Silla. The ESO Headquarters are located in Garching, near Munich, Germany. It is the scientific-technical and administrative centre of ESO where technical development programmes are carried out to provide the La Silla observatory with the most advanced instruments. There are also extensive facilities which enable the scientists to analyse their data. In Europe ESO employs about 200 international Staff members, Fellows and Associates; at La Silla about 50 and, in addition, 150 local Staff members.

The ESO MESSENGER is published four times a year: normally in March, June, September and December. ESO also publishes Conference Proceedings, Preprints, Technical Notes and other material connected to its activities. Press Releases inform the media about particular events. For further information, contact the ESO Information Service at the following address:

List of Preprints

(September-October 1995)

Scientific Preprints

1102. P. Molaro, S. D'Odorico, A. Fontana, S. Savaglio, G. Vladilo: Chemical abundances in the damped system at $z=3.390$ towards QSO 0000-2619. AA.
 1103. D. Minniti: Kinematics of bulge giants in field F588. *Ap.J.*
 1104. L. Kaper, H.F. Henrichs, J.S. Nichols, L.C. Snoek, H. Volten, G.A.A. Zwarthoed: Long- and short-term variability in O-star winds. I. Time series of UV spectra for 10 bright stars. AA.
 1105. D. Minniti: Field stars and clusters of the galactic bulge: implications for galaxy formation. *Ap.J.*
 1106. A.A. Zijlstra, C. Loup, L.B.F.M. Waters, P.A. Whitelock, J.T. van Loon, F.

Guglielmo: Obscured AGB stars in the Magellanic Clouds II. Near-infrared and mid-infrared counterparts.
M.N.R.A.S.

1107. M. Villar-Martín, L. Binette: Ca depletion and the presence of dust in large scale nebulosities in radio-galaxies (I). AA.
 1108. P. Dubath, B. Reipurth, M. Mayor: Radial and rotational velocities of young stars in Chamaeleon and Lupus. AA.
 1109. N.S. van der Blieck, B. Gustafsson, K. Eriksson: Stellar far IR fluxes: how accurate are model predictions? AA.
 1110. S. Stefl, L.A. Balona: Rapid photometric and spectroscopic variability of the Be star DX Eri. AA.

Technical Preprint

69. ESO Contributions to the Conference "New Modes of Observing for the Next Century", Hilo, Hawaii, July 6-8, 1995. Astron. Soc. Pacific Conference Series

Contents

R. Giacconi: ESO 1993 to 2000 plus 1

TElescopes AND INSTRUMENTATION

- E. Allaert: The VLT Sequencer 5
 A. Longinotti, C. Cumani, P. Duhoux: The VLT CCD Detectors Control Software 7
 D. Hofstadt: Restructuring La Silla 10

NTT News: J. Spyromilio 11

Additional News from the La Silla Site

- News from the Telescope Teams 12
 - A. Gilliotte: The quality of the 3.6m main mirror 13
 - The Aluminisation of the Main Mirrors 14
 - S. Guisard: The seeing at the 3.6m Telescope 15
 - C. Lidman and R. Gredel: Calibration of the IRAC2B Fabry-Perot 15
 - C. Lidman: IRAC1 15
 - B. Stecklum, T.L. Hayward, M. Feldt and M. Loewe: ADONIS unveils Ultra-compact HII Regions Morphology 16
 - First light on COMIC and SHARP II+ 16

REPORTS FROM OBSERVERS

- S. Ortolani, B. Barbuy and E. Bica: NTT-SUSI Images with Superb Seeing (0.34"-0.40") of Terzan 5 20
 D. Minniti, M.V. Alonso, P. Goudrooij, G. Meylan and P. Jablonka: New Globular Clusters Identified in the Inner Regions of NGC 5128 Using ESO and HST data 22
 R. Chini and E. Kruger: Activity in Galaxies 25
 J.Th. van Loon, A. Zijlstra, L.-A. Nyman and V. Bujarrabal: Discovery of the First Extra-galactic SiO Maser, and the Quest for More 27
