

NEON

Observing School 2012

Asiago Observatory, Italy, 10–22 September

The Network of European Observatories in the North (NEON: Asiago Observatory [Italy], Calar Alto Observatory [Germany, Spain], European Southern Observatory, Haute Provence Observatory [France], and La Palma Observatory [ING and NOT: UK, Netherlands, Spain, Nordic Countries]) is pleased to announce the 10th NEON Observing Summer School.

The purpose of the school is to provide an opportunity to gain practical experience in observation and data reduction in astrophysics.

Observing runs at the telescopes (1.82-metre Cima Ekar, and 1.22-metre Galileo) are organised in small groups, focusing on modern astrophysical topics, followed by data reduction and analysis under the supervision of experienced astronomers. The hands-on sessions are complemented by lectures on observational techniques.

The school is open preferentially to PhD students in astrophysics and post docs, who are nationals of a Member State or an Associate State of the European Union, but some places will also be available for nationals of surrounding countries.

The application deadline is 20 April 2012.
