

The background of the slide is a deep space image featuring a dense field of stars and several prominent galaxies. A large, bright, yellowish-white galaxy is visible in the lower center, with a complex, filamentary structure. To its left, there's a smaller, more compact galaxy. In the upper left, a long, thin, reddish-pink filamentary structure stretches across the frame. The overall color palette is dominated by the dark blues and blacks of space, punctuated by the warm yellows and oranges of the galaxies and the cooler blues and purples of the intergalactic medium.

MULTI-PHASE, MULTI-TEMPERATURE AND COMPLEX

How feedback shapes the nature of the CGM, halo gas,
and galaxies from galaxy groups to clusters
