

An ESO fulldome mini show

JOURNEY TO THE CENTRE OF THE MILKY WAY

Featuring the Sacred Site soundtrack by
Michael Stearns

Embark on a *Journey to the Centre of the Milky Way* and during seven minutes travel faster than light, from the driest place on Earth, the Atacama Desert in Chile right to the centre of our own galaxy, where a black hole is consuming anything that strays into its path. 84 million stars will appear in front of your eyes, each hiding mysteries waiting to be solved. Are there planets around them, perhaps with moons? Do they have water? Could they harbour life?
